AWARENESS FOR CHANGE

AWARENESS FOR CHANGE

Through our work, we help coffee enhance its positive impact on both people and the planet.

To realise this vision, the coffee sector must evolve driven by each individual.

This change is possible when we all become more aware.

Our purpose is to nurture people's awareness to lead transformation together.

OUR PATH

We began roasting specialty coffee over 30 years ago, in 1994.

We've navigated all the waves in the coffee market and still focus on selecting and roasting quality coffee.

Our work is fuelled by passion and curiosity, always guided by a deep sense of responsibility toward both the present and the future.

We believe our industry needs change. To make this happen, we all need to work together, with each individual being aware of and committed to helping the coffee make a real difference for people and the planet.

Our new payoff - **Awareness for Change** - embodies our dedication to transforming aspirations into tangible actions. This commitment is realised through our new, recyclable, resealable, and carbon-neutral packaging; our first Sustainability Report; and our entry into the direct-to-consumer market, enabling us to share our values directly with coffee lovers at home.

Our aim is to foster a community of mindful consumers and baristas who, like ourselves, play a little yet meaningful role in the evolution of our industry.

BLENDS

Our blends are developed for café use, while also offering consumers the opportunity to enjoy the same experience at home.

We've crafted our blends to be balanced and pleasant, appealing to all espresso enthusiasts: from those who appreciate the warm notes of a traditional Italian espresso to those seeking a more aromatic and international flavour.

Our blends use single-estate Arabica Specialty and Fine Robusta beans, as well as carefully selected coffees.

In every case, they contain coffees selected by us in their countries of origin, carefully blended to create products that are easy to love, and fully transparent.

Elpy, our mascot featured on every pack, helps you pick the coffee that best suits your needs and, if you want to learn more, just scan the QR code.

SINGLE ESTATE COFFEES

All our single-estate coffees are 100% Arabica Specialty, sourced from specific plots with a fully traceable supply chain, back to the producer.

We select our coffees by travelling through their countries of origin, and uncovering stories, people, landscapes, and flavours.

Each coffee tells the story of a place, its land, and its community.

Our mascot Elpy shares a snippet about the story behind each product. To learn more, simply scan the QR code.

Originally crafted for cafés to offer an innovative taste experience, these coffees are now also available for home use. Their packaging has been thoughtfully designed to share our values with coffee enthusiasts and bridge the gap between home and café consumption.

WATER DECAF

The water caffeine removal process is a chemical free technique that preserves all the qualities of the coffee.

To remove caffeine, the beans are exposed to steam, soaked in water (containing the components to be preserved), carbon filtered and then dried in ovens.

Our water decaffeinated coffee has a light and delicate taste, with no trace of those unpleasant flavours which are often found in decaffeinated coffees.

LIMITED EDITION

The Limited Edition coffees are our most experimental and innovative products.

They are all Arabica Specialty coffees with exceptionally high cupping scores.

These coffees are available in limited quantities, and every bag is numbered, as a proof of its uniqueness.

With this line, we thrill in selecting and roasting the most peculiar coffees we come across on our travels, offering new options to baristas and everyday coffee lovers, and transforming specialty coffee consumption into an ongoing discovery of surprising flavours and aromas.

BEYOND COFFEE BEANS

We bring our values, methods, and experience to more than just whole beans — extending them to ground coffee, pods, merchandise, and all the products that round out our offering.

We offer Cold-brew Concentrate to make this beverage easy to prepare.

We offer ground coffee for more traditional home brewers, and pods for those who prefer a single serve, for small businesses, and for workplace coffee corners.

Our promotional materials support baristas in conveying our brand values and product features, while also enriching the customer experience through thoughtfully designed elements that enhance the overall coffee journey.

COLD-BREW ✦ CONCENTRATE

Our Cold Brew Coffee Concentrate is made with single estate arabica specialty coffee and is easy to use! Simply dilute it, and it's ready to be enjoyed in a variety of recipes! Here are some examples:
Cold brew on the rocks, Cold brew tonic, Cold brew with oat milk, Cold brew gin & tonic Iced Americano cocktail with coffee.
